PROFESSIONAL SUMMARY

Licensed Optometrist and Full Stack Developer with a unique cross-disciplinary skill set combining eye care expertise and software engineering. Graduated with a Diploma in Optometry (3.60 GPA) with hands-on clinical experience and a track record of engineering over 50 scalable web applications. Proficient in Laravel, PHP, and modern API integrations (including AI/AR capabilities). Strongly committed to the digitalization of medical and corporate processes, bridging the gap between healthcare needs and user-friendly technological solutions.

WORK EXPERIENCE

Bina Sehat General Hospital | Bandung, Indonesia
Optometrist

Oct 2023 - Present

- Manage over 40 patients daily, executing high-precision clinical refraction examinations for myopia, hyperopia, astigmatism, and presbyopia.
- Execute vision rehabilitation programs, resulting in 90% of patients reporting improved quality of life post-lens adjustment.
- Drive patient compliance up by 80% through effective consultations and optical education.
- Collaborate with medical specialist teams to detect early indications of cataracts, glaucoma, and diabetic retinopathy.

Freelance Web Developer | Bandung, Indonesia
Full Stack Developer

Feb 2018 - Present

- Developed, optimized, and deployed >52 full-stack web applications for government entities, corporate clients, and non-profit foundations using Laravel, PHP, and JavaScript.
- Translated complex business requirements into robust database architectures, boosting client operational efficiency by 20% within 6-month cycles.
- Mitigated system errors and bugs by 30% through proactive debugging and query performance optimization.
- Independently managed the complete Software Development Life Cycle (SDLC), maintaining a client satisfaction rate exceeding 90%.

SELECTED PROJECT PORTFOLIO

Note: Most projects are subject to strict NDAs and are presented descriptively.

- **Virtual Try-On Glasses (AI & AR):** Engineered an AI-driven Face Shape Detection algorithm utilizing Augmented Reality to map user facial structures via camera and recommend aesthetically precise optical frames in real-time.
- **HRIS Corporate System:** Architected an end-to-end Human Resources Information System automating geolocation attendance, dynamic payroll, and KPI evaluation.
- **Primaya Mother Care:** Built a digital healthcare platform to schedule consultations and monitor WHO-standard toddler growth charts interactively.
- **Widyaloka (Interactive Cultural Map):** Developed a Geographic Information System (GIS) visualizing the spatial distribution of Indonesian cultural heritage and languages.
- **IVCS & Marmot (Vision Care Systems):** Digitized optometry diagnostic workflows and optical clinic management into centralized, secure medical record applications.

EDUCATION

STIKes Dharma Husada | Bandung, Indonesia
Diploma in Optometry — GPA: 3.60 / 4.00

Graduated 2023

ORGANIZATIONAL EXPERIENCE

Indonesia Melihat Nusantara Foundation

Sep 2020 - Present

Head of Media & Communications Division

- Spearheaded the digital transformation of foundation operations by designing a centralized management system for data recapitulation.
- Directed the organization of the National Social Service program, encompassing volunteer management and program transparency reporting.

TECHNICAL SKILLS

- **Web Development:** Laravel, PHP, HTML5, CSS3, modern JavaScript, RESTful APIs.
- **Databases & Engineering:** MySQL, SQLite, Relational Database Design, Clean Code Architecture.
- **Clinical Optometry:** Refraction Exams, Early Disease Detection, Electronic Medical Records (EMR).
